

## Perfect Espresso Automatically

The Concordia IBS is the perfect espresso and hot coffee station designed with flexibility in mind. In one easy step fresh beans, fresh milk, and fresh water combine to create world-class beverages. You can pour frothy cappuccinos, incredible lattes, and perfect espresso shots at the touch of a button. The low profile bean hopper accommodates two different types of beans, giving you more beverage choices.

***It's simple. It's flexible. It's perfect.***

### Iced Drinks

For sensational iced lattes the user simply fills a cup with ice, presses the "Cold Drink" button, and the IBS does the rest.

### Easy to use touchpad

The exclusive picture based touchpad makes it easy for self-serve users to produce drinks at the touch of a button.

### On-board refrigerator

Built-in refrigerator holds fresh milk in a one-gallon container.

## More beverage options...less equipment.

Everyone knows that to make world-class espresso beverages you need great beans. In the past, you also needed a professional barista who had weeks of training and hours of practice in the art of creating quality beverages. Even then, the quality of drink varies from barista to barista and from day to day.

**With the Concordia IBS it's no longer just about the beans...or even the barista! It is about simplicity, consistent quality of the beverage, and customer choice.**

### Simple to Use – No Barista Required

Everything needed to make outstanding espresso drinks is built right into the machine. You just need to choose the drink and press a button. The exclusive picture based touchpad walks you right through the process. The IBS does the rest, in one simple step, with no training required. And, the simple cleaning process takes only about 10 minutes a day.

### Quality Beverages

The computer controlled grinding and extraction process are programmed to your specifications insuring that espresso is created the same every time the button is pressed. The temperature and consistency of the milk is also computer controlled, and set to the type of beverage selected. Espresso and steamed milk are poured simultaneously, at just the right time, so perfect cappuccinos and lattes are made without moving the cup. When no beverages are being made, the machine performs a self-rinse cycle to guarantee fresh tasting beverages. In addition, every Concordia model is Tested and Certified by the National Sanitation Foundation (NSF) assuring you and your customers of our commitment to quality.

### Customer Choice

You have the option of offering one of the four basic espresso drinks: Espresso, Latte, Cappuccino, and Americano. Drinks can be easily customized with options that include a large drink, decaf or extra espresso shot. The IBS even makes sensational iced drinks. You simply fill a cup with ice and press the "Cold Drink" button; the IBS does the rest. Additionally hot water or steamed milk can be selected for making tea, cocoa, and steamers. And cold milk can be dispensed at the touch of a button. Along with flavored syrups, hundreds of drink recipes can be made – limited only by your imagination.
